

- The EasyCam client can be used to:
 - Capture camera feeds and display this to a screen with minimal delay.
 - Add graphical layering including delegate names on top of the video.
 - Perform video switching.

- When the EasyCam client is started for the first time;
 - EasyCam client will open full-screen.
 - An introduction text will appear.
 - The EasyCam client setup menu will appear.
 - Video sources are detected.

➤ The EasyCam settings will automatically appear the first time. Open the settings manually can be done in two ways;

- Click on the **EasyCam client window**, then press **F12**.
- Right-click on **EasyCam**  icon and click **Settings**.
