

→ On your desktop double click at **Unisim.bat** to open the simulator.

→ The following windows will be opened:

- 1: Simulator main window: to add more units.
- 2: You can close this black box, you don't need it.
- 3: This is a 'NG chairman unit' (DCN-CONCM: #1) #1 means it's unit number 1.
- 4: This is a normal 'NG unit' (DCN\_CONFF: #8) #8 means it's unit number 8, there will be 6 more simulation units underneath this unit. Just place them in order somewhere on your (2<sup>th</sup>) computer screen so you'll be able to use all of them.

→ On your desktop double click at **Unisim.bat** to open the simulator.

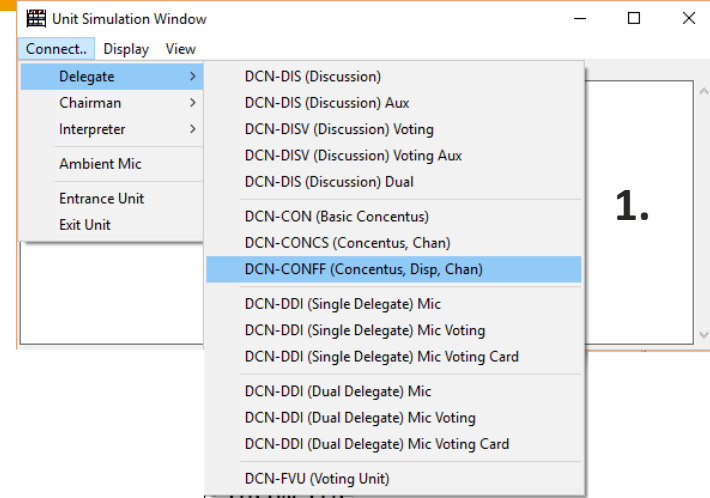

→ To add more (NG simulation) units, please follow the steps below.

**1:** At the simulator main window, click **Connect..** Then click **Delegate** then click at **DCN-CONFF (Concentus, Disp, Chan)** to add a new NG simulation unit.

**2:** A new unit will appear, like picture **2**. This is a new 'NG unit' (DCN\_CONF: #9) #9 means it's unit number 9.

**4:** Add more units until you have the amount of units you need, if you add too much units, just click the '**Plug**' button on the unit to disconnect it.

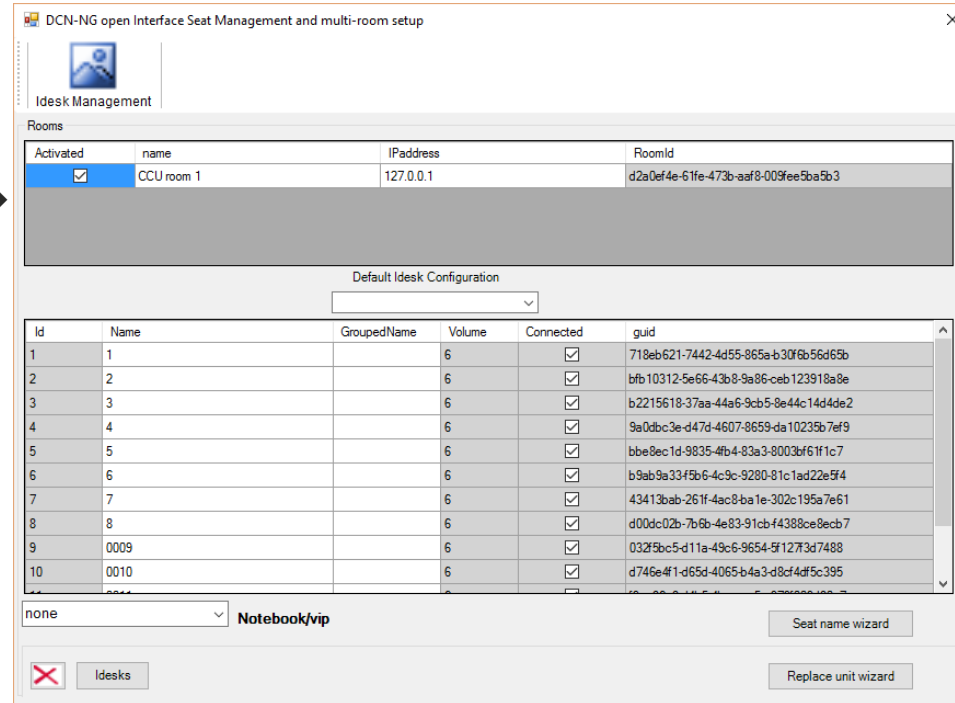

**2.**

Default, the NG units will receive names like 0001, 0002 etc. Since this is not easy to work with, we advice to change the units names in our software. Please follow the steps below to change their names.

Please open MVI Voting and Control →  
Now open the NG seat management

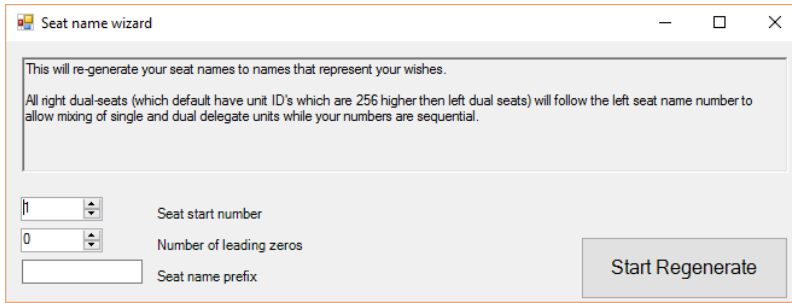

Default, the NG units will receive names like 0001, 0002 etc. Since this is net easy to work with, we advice to change the units names in our software. Please follow the steps below to change their names.

In this case we allready changed the first 8 seat names.

Please follow the steps below:

1. Click at the **Seat name wizard** button.
2. Click **OK** at the small warning that will appear.
3. Seat start number must be **1**.
4. Number of leading zeros must be **0**.
5. Seat name prefix must be empty.
6. Now just click the big **Start Regenerate** button.

Seat name wizard

This will re-generate your seat names to names that represent your wishes.

All right dual-seats (which default have unit ID's which are 256 higher then left dual seats) will follow the left seat name number to allow mixing of single and dual delegate units while your numbers are sequential.

1 Seat start number

0 Number of leading zeros

Seat name prefix

Start Regenerate
